Yug Shah

Security professional

yugdshahcs@gmail.com
https://www.linkedin.com/in/yugshah369/

Professional Summary

Security professional with hands-on experience in technical validation, PoC delivery, and solution architecture across security and networking. Able to bridge technical implementation with business value through cross-functional collaboration, clear communication, and customer-focused problem-solving. Familiar with AI technologies and how to secure them.

Experience

Technical Solutions Intern — Palo Alto Networks

2026-03 to 2026-10

Supported technical solution design and implementation for customer-facing projects; identified technical challenges and delivered solutions aligned with customer needs. Assisted in executing technical demonstrations, POCs, and troubleshooting; provided technical guidance throughout. Collaborated with cross-functional teams on solution documentation, best practices, and support optimization.

Projects

Authguardian
https://github.com/Y-yug-S-shah/AuthGuardian
Built Splunk queries to detect abnormal authentication behavior across login logs in Virtual Box. Identified failed login spikes, unusual access patterns, and account misuse. Analyzed and correlated 100+ authentication log events.

PhishHound
https://github.com/Y-yug-S-shah/phishhound
Developed a Python CLI tool to analyze email headers and extract phishing indicators. Validated SPF, DKIM, and DMARC results from headers and generated structured IOC output. Automated parsing and analysis workflows using Python scripting and regular expressions.

Education

Mukesh Patel School of Technology and Management Engineering, NMIMS
Bachelor of Technology in Computer Science • 2026

Skills

Technical Validation & PoCs
Technical architecture design • Security assessment • Product demonstration • Proof of Concept delivery

Technical Stack
Python • Web security • Networking • LLM/AI prompt engineering • Splunk • PANW EDR/XDR/XSIAM/SIEM • Identity Security • Prisma AIRS

Collaboration
Customer problem diagnosis • Technical explanation to non-technical audiences • Cross-functional teamwork • Stakeholder management • Documentation • Consultative approach

Certifications
Palo Alto Networks Certified Network Security Professional (Ongoing)
Palo Alto Networks Certified Security Operations Professional
Palo Alto Networks Certified Cloud Security Professional
Palo Alto Networks Certified Cybersecurity Practitioner
CompTIA Security+ (SY0-701)
SOC Level 1 from TryHackMe
